

### **DETAILED ACTION**

1. This Office Action is responsive to the telephonic Interview conducted with the Applicant's representative on 1-22-2010. Claims 39-52 are pending and have been examined.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Pruner on 1-22-2010.

The application has been amended as follows:

IN THE CLAIMS:

Claim 51 is cancelled.

Please amend the following claims as shown:

39. A method comprising: receiving, over a global computer network, an unsolicited request from a first computer system coupled to the global computer network for a second computer system coupled to the global computer network to provide an identification of the second computer system;

in response to the request, providing a visual interface on the second computer system to notify both a user of the second computer system of the request and prompt the user to allow or deny the request; and

in response to the user allowing the request providing a hash value to the first computer system, the hash value being generated by encryption of a key associated with a first computer system with an identifier that identifies the second computer system, and

based on a response of the user to the request, selectively communicating the key to a browser of the second computer system.

43. An article comprising a storage medium readable by a first processor-based system, the storage medium storing instructions to cause a processor of the first processor-based system to:

receive an unsolicited request over a global computer network from a first computer system coupled to the global computer network for a second computer system to provide an identification of the second computer system;

in response to the request, provide a visual interface on the second computer system to notify both a user of the second computer system of the request and prompt the user to allow or deny the request; and

in response to the user allowing the request, provide a hash value to the first computer system, the hash value being generated by encryption of a key associated with the first computer system with an identifier that identifies the second computer system, and

based on a response of the user to the request, selectively communicating the key to a browser of the second computer system.

47. A system comprising: a database; and a first computer coupled to the database to:

receive an unsolicited request over a global computer network from a second computer coupled to the global computer network for the first computer to provide an identification of the first computer;

in response to the request, provide a visual interface on the first computer to notify both a user of the first computer of the request and prompt the user to allow or deny the request; and

in response to the user allowing the request, provide a hash value to the second computer, the hash value being generated by encryption of a key associated with the second computer with an identifier that identifies the first computer, and

based on a response of the user to the request, selectively communicating the key to a browser of the second computer system.

***Allowable Subject Matter***

3. Claims 39-50 and 52 are allowed.

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul E. Callahan whose telephone number is (571) 272-3869. The examiner can normally be reached on M-F from 9 to 5.

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's supervisor, Emmanuel Moise, can be reached on (571) 272-3865. The fax phone number for the organization where this application or proceeding is assigned is: (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
